PERSONAL PROFILE

I am a meticulous undergraduate first year student who is eager to undertake complex tasks, meet tight deadlines and deliver outstanding performance. I possess practical knowledge in web design, web development and programming. Currently studying towards a BSc in Computer Science; I am seeking a Professional Pathway placement which will assist me in learning new skills as well as developing my current ones further.

EMPLOYMENT HISTOY

Fluid Designer, 3D Printing Company, London

Feb 2015 – Mar 2015

Web designer; Product developer

- Developed a website that respects the requirements given by the client.
- The website is mobile ready and has been developed using WordPress.
- Tested current products and developed a number of items that were sold on the website created as well as other platforms.

Blue Ocean, Property Consultants, Harrow, London

April 2012 – May 2012

Estate Agent

- Being present on the field to discuss property details with potential or current customers.
- Answering phone calls and giving individuals information about the properties the company had to offer at the given time.
- Handling customer complaints and directing them to my superiors.

Ovidiu Balau

TRANSFERABLE SKILLS

- **Planning and Time Management**– developed through university where I have to ensure I meet tight deadlines for coursework submissions through organising and managing my time well.
- **Team Working** – I am an exceptional team player with the ability to coordinate with a number of teammates. In my job as a web designer and product developer I had to coordinate my team to meet the client's goals.
- **Critical Thinking** – I am able to make decisions while under pressure and think in a critical manner effectively. As a web designer I had to take certain decisions without consulting the clients to ensure that my time was spent effectively
- **Communication** - As an estate agent I had to actively communicate with actual and potential clients ensuring that they had all the information available for their enquiry, which would benefit them.

PROJECTS

- **Contract Gardening - 2016 – Web Design** – A website created for a gardening company which provides gardening supplies; for this website I have used a number of JavaScript libraries as well as jQuery to achieve the client's desired result.
- **DLE - 2015 – Web Design** – A website created for a company which offers security services. Along with the standard web design, the website is mobile ready and optimized for various search engines.
- **Computer Crazy - 2015 – Web Design** – A mobile ready website created for a pseudo-company, as required for my coursework.

HOBBIES

- Fitness
- Chess
- Web design
